KEY SKILLS

|                  |                          |                     |
|------------------|--------------------------|---------------------|
| PHP              | Laravel                  | Vue.js              |
| JavaScript       | RESTful APIs             | PostgreSQL          |
| MySQL            | Redis                    | Elasticsearch       |
| Docker           | AWS                      | System Architecture |
| OOP              | Design Patterns          | SOLID Principles    |
| Pinia            | Inertia.js               | Laravel Blade       |
| SQL Optimization | Performance Optimization | Web Vitals          |
| Queues           | Caching                  | Swagger/OpenAPI     |
| Nginx            | Linux                    | GitHub/GitLab       |
| RAG              | AI-Assisted Development  | Prompt Engineering  |
| Cursor           | Claude Code              | ChatGPT             |

EXPERIENCE

- Senior Laravel Developer

February 2024 - Present

Priceoye Technologies

Islamabad

  - Modernized the PriceOye e-commerce platform by refactoring tightly coupled legacy code into modular, object-oriented architecture using **Factory, Repository, Service, and DDD patterns**.
  - Contributed to the **Laravel 10 → 11** migration while maintaining compatibility across application modules.
  - Designed and owned key systems including the **Delivery Charges Module** and an administration-side **Approval & Audit System** for tracking changes, approvals, and before/after values.
  - Redesigned and migrated the **PriceOye Cart** from Laravel Blade to Vue.js, implementing reusable components and Pinia-based state management while improving frontend architecture and maintainability.
  - Built and enhanced reusable **Vue.js components** and worked toward a single source of truth across frontend state and application workflows.
  - Improved Web Vitals and application performance by reducing large JSON/object payloads, optimizing frontend data processing, and improving SQL queries and backend efficiency.
  - Applied SQL performance tuning through indexing, query optimization, and refactoring across high-traffic modules.
  - Contributed to **Elasticsearch** optimization for product search and discovery, focusing on search performance and relevancy.
  - Authored **Swagger/OpenAPI** documentation covering request/response schemas and authentication flows.
  - Implemented Laravel **Model Observers**, caching strategies, scheduled tasks, and queue workers to automate business workflows, and contributed to Docker-based development environments.
  - Collaborated with frontend, QA, product, and engineering teams and contributed to broader team initiatives and intern training.
- Software Engineer (PHP/Laravel)

August 2021 - February 2024

Peek International

Rawalpindi

  - Delivered full-stack applications using **Laravel, Vue.js, and Inertia.js**, implementing reactive frontends and API integrations.
  - Architected and documented **RESTful APIs** using Swagger for distributed teams across the UK, Brazil, and Bangladesh.
  - Built real-time features using **Laravel WebSockets** for notifications and synchronized live data.
  - Automated deployments with custom **Artisan commands** and internal package development.
  - Managed AWS infrastructure including **EC2, S3, SES, and DynamoDB**, and optimized server environments using Nginx, Apache, and Supervisor.
  - Applied OOP, SOLID principles, and reusable service-based structures to maintain consistent application architecture.
- MERN Stack Training

February 2023 - April 2023

Teresol Pvt. Ltd

Islamabad

  - Completed a 300-hour intensive **TechLift MERN Program** covering MongoDB, Express.js, React, Node.js, and modern JavaScript workflows.
  - Built full-stack applications with authentication, REST APIs, component-based architecture, and state management.
  - Practiced Agile methodology, Git workflows, and collaborative code reviews through real-world projects.

## SELECTED PROJECTS

---

- **PriceOye** — Full-stack product engineering across Laravel/PHP and Vue.js, including Cart modernization, Delivery Charges, Approval & Audit, performance optimization, Elasticsearch, APIs, and legacy-code modernization.
- **SheenPay** — **BNPL Platform** — Contributed to research, application planning, architecture, implementation planning, and full-stack development. Built configuration-driven multi-step forms, payment/installment workflows, idempotency, APIs, and external integration capabilities; solely owned frontend development and the Email Module.
- **Echo** — **Customer Engagement Platform** — Currently contributing to an internal platform used by PriceOye and SheenPay across research, application planning, system architecture, technical documentation, and implementation.
- **Social Desk** — **AI Social Engagement Platform** — Improved RAG and Knowledge Base architecture with intent-aware retrieval, ranking, filtering, confidence scoring, embeddings, centralized AI reply generation, and Meta/Facebook/Instagram integration and reliability improvements.
- **TransPro Alliance** — **Multi-Tenant SaaS CRM**
- **Data Transfer Objects** — **Laravel Package/Library**

## EDUCATION

---

- **MSc Computer Science** October 2018 - March 2021  
• *Khawaja Fareed University of Engineering and Technology (KFUEIT)*
- **BSc Computer Science** 2016 - 2018  
• *The Islamia University of Bahawalpur (IUB)*

## LANGUAGES

---

- Pashto — Mother tongue, full proficiency
- English — Professional working proficiency
- Urdu — Native, full professional proficiency
- Punjabi — Limited working proficiency
- Seraiki — Limited working proficiency
